

HOUSE RESOLUTION No. ____

Introduced by: Friend

A HOUSE RESOLUTION urging the study of automated traffic control systems for use within construction and maintenance zones.

Whereas, Hundreds of Hoosier men and women in the construction trades risk their lives each day while working alongside roads, highways and interstates around the state;

Whereas, It may be necessary and appropriate to grant the Indiana State Police additional means to control the speed of vehicles and thereby ensure worker safety within construction or maintenance zones established in accordance with IC 9-21-5-11(a);

Whereas, A significant positive impact on safety could be had by allowing the use of electronic traffic tickets in those cases where workers are present in a construction or maintenance zone and where the operator of the vehicle can be identified by photograph or recorded image generated by an automated traffic control system;

Whereas, A public awareness campaign would need to accompany the implementation of such automated traffic control systems: Therefore,

Be it resolved by the House of Representatives of the
General Assembly of the State of Indiana:

SECTION 1. That the legislative council is urged to establish a study commission on the use of automated traffic control systems within construction and maintenance zones and to consider establishing a pilot project to evaluate the effectiveness of the automated traffic control technology.
